## **DETAILED ACTION**

### ***Terminal Disclaimer***

1. The terminal disclaimer filed on July 12, 2004 disclaiming the terminal portion of any patent granted on this application which would extend beyond the expiration date of U.S. Patent No. 6,687,440 has been reviewed and is accepted. The terminal disclaimer has been recorded.

### ***Allowable Subject Matter***

2. Claims 1 and 3-6 are allowed.

The following is an examiner's statement of reasons for allowance: As the claims were read and interpreted light of the specification, the prior art of record fails to specifically disclose an optical fiber having an elevated threshold for stimulated Brillouin scattering comprising a longitudinally extending core with a first index of refraction and a first acoustice wave propagation velocity, a cladding surrounding the core and extending lengthwise along the core and also having a second refractive index of refraction and a second acoustic wave propagation velocity that is less that that of the first index of refraction and first acoustic wave propagation velocity of the core, and in particular, an irregular coating is comprised of an acoustically dampening material that is acoustically matched to the cladding such that the cladding varies in a lengthwise direction in order to alter a mode profile of the acoustic waves. Although Jen (U.S. Patent No. 5,170,457) and Akasak et al. (U.S. Patent No. 5,848,215) disclose a similar

fiber, the references fail to specifically disclose the particular an irregular coating is comprised of an acoustically dampening material that is acoustically matched to the cladding such that the cladding varies in a lengthwise direction in order to alter a mode profile of the acoustic waves.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
